

Monday August 20, 2007
Meet
Eva Marsh MEng BSc author of

Since diagnosis in 1967, Eva has explored the history and research of multiple sclerosis and has recovered from all the damage caused by the disease process.

LEARN about the research that led Eva to challenge accepted opinions and the cutting-edge research advances on healing.

SEE the vital moves that speed healing and reconnect damaged pathways.

HEAR how Eva's experience is a model for wellness and mobility and how you can

ACHIEVE the state of wellness Nature intended.
